

August 3, 2019

Hello, all.

Performing this overview of Curtis Media is a pleasure; however, it is a serious referral to those teams and leadership considering them. As a Director of a Research and Evaluation company, having earned a doctorate in Public Health from a noted university, Complex Systems Innovations (CSI) realizes the value and benefit of cost-effective offline and online expertise.

Moreover, whether executing offline activities (publishing, tri-folds, brochures, rack cards, newsletters/newsprint, etc.) or performing online tasks (videos, websites, social media, drone footage, podcasts, etc.) Curtis Media is both competitive and can operate within the guidelines of any work plan. Their additional services, which include editing, spreadsheets, and data-driven strategic planning and reporting, have been especially useful as well.

Providing a comprehensive list of services available to you are details you should work out with them, and then decide what you need, which may include printing, for instance, a service that is arguably their greatest attraction, especially in larger numbers. The return on investment will amaze you, no matter how big or small the assignment. Curtis Media never over-promises or under-delivers; the opposite is true. Work with them to get the most out of your budget, and please contact me as needed.
